

DECLARATION OF CONFORMITY IN ACCORDANCE WITH REGULATION (EU) 2023/988

TO WHOM IT MAY CONCERN:

Since the cosmetics sector is in fact regulated at European level by Regulation 1223/2009, and subsequent regulatory provisions, which contain the same objectives set out in Regulation (EU) 2023/988 on product safety, the application of which would start on 13/12/2024, no obligations other than those already present and implemented by the undersigned are foreseen.

Therefore:

M.MAGI SRL, in the responsible person, Giorgio Zunino, with registered office and operational headquarters in
VIA DELLA BOTTE 18 A/B, 31030 ALTIVOLE TV – ITALY

DECLARES

- as a manufacturer, to comply with all the requirements introduced by the GPSR
- all the products supplied comply with the obligations established in the GPSR.

Furthermore:

Starting from 13/12/2024 any specific information in relation to the provisions of Regulation (EU) 2023/998 on the general safety of "GPSR" products, can be obtained from the website www.mmagi.it by consulting the relevant product sheet.

In Faith

M.MAGI SRL

Altivole, 14 Novembre 2024

Regulation (EU) 2023/998 on the general safety of products "GPSR"

Given that the cosmetics sector is in fact regulated at European level by EU Regulation 1223/2009 and its subsequent regulatory provisions, which contain the same objectives set out in the regulation in question on product safety, the application of which starts on 13 December 2024, no obligations other than those already in place and implemented by M.MAGI SRL are foreseen.

However, M.MAGI SRL wishes to point out and recommend:

- **The most** effective way to check the quality of a cosmetic product and your individual safety is to read the list of ingredients on the label. The description of the components is done following an international standard: the INCI (International Nomenclature of Cosmetic Ingredients).
- **Carefully** read the indications and instructions printed on the package, on any leaflet, on any manual for use by the beauty operator, or on the website www.mmagi.it.
- **Body** beauty mask product, contained in a PE tube, with safety seal closure.
- **External** use.
- **Product** intended for Professional use by an adult audience: keep away from children.
- **Specific** cream emulsion, as indicated in the media indicated above, for exclusive professional use by personnel qualified for the profession, who based on their science, knowledge and experience are able to use it in the right and correct way.
- **Apply** the product to healthy skin, therefore not damaged, free from wounds, abrasions and burns.
- **It** is advisable to carry out a simple test before using the product on the body, especially for the most sensitive subjects, testing the product on a small portion of skin of the forearm, and wait the following 24 hours to ascertain any allergic reactions other than a slight redness (typical of the action of the product) which will disappear in short time.
- **If** the product should inadvertently come into contact with eyes and/or mucous membranes, rinse the affected area thoroughly with fresh water.
- **If** the product is inadvertently ingested due to some incorrect maneuver, take the product composition/ingredients, printed on each primary or secondary package, to a poison center of a hospital. In the absence of hospitals, induce vomiting.
- **The** product is used by spreading it with a spatula on the area to be treated, then left on for a maximum of 15 minutes, also in relation to the skin sensitivity of the subject being treated. After the time has elapsed, it is removed with sponges dampened with fresh water, or better if soaked in a tonic for sensitive skin. At the end of the treatment, a slight redness may appear on the treated area. This redness, visible proof of the product's activity, will subsequently disappear leaving the treated area pleasantly smooth.
- **Do** not exceed the times and quantities of product to be applied, in relation to the type of skin, which are indicated.
- **Take** care to close the container well after use, so as not to create oxidation or contamination of the product.
- **Do** not exceed, from the moment of opening the product package, the time of use of the product indicated on the package by the PAO, of 6 months.
