

DECLARATION OF CONFORMITY IN ACCORDANCE WITH REGULATION (EU) 2023/988

TO WHOM IT MAY CONCERN:

Since the cosmetics sector is in fact regulated at European level by Regulation 1223/2009, and subsequent regulatory provisions, which contain the same objectives set out in Regulation (EU) 2023/988 on product safety, the application of which would start on 13/12/2024, no obligations other than those already present and implemented by the undersigned are foreseen.

Therefore:

M.MAGI SRL, in the responsible person, Giorgio Zunino, with registered office and operational headquarters in
VIA DELLA BOTTE 18 A/B, 31030 ALTIVOLE TV – ITALY

DECLARES

- as a manufacturer, to comply with all the requirements introduced by the GPSR
- all the products supplied comply with the obligations established in the GPSR.

Furthermore:

Starting from 13/12/2024 any specific information in relation to the provisions of Regulation (EU) 2023/998 on the general safety of "GPSR" products, can be obtained from the website www.mmagi.it by consulting the relevant product sheet.

Altivole, 14 Novembre 2024

Regulation (EU) 2023/998 on the general safety of products "GPSR"

Given that the cosmetics sector is in fact regulated at European level by EU Regulation 1223/2009 and its subsequent regulatory provisions, which contain the same objectives set out in the regulation in question on product safety, the application of which starts on 13 December 2024, no obligations other than those already in place and implemented by M.MAGI SRL are foreseen.

However, M.MAGI SRL wishes to point out and recommend:

- **The most** effective way to check the quality of a cosmetic product and your individual safety is to read the list of ingredients on the label. The description of the components is done following an international standard: the INCI (International Nomenclature of Cosmetic Ingredients).
- **Carefully** read the indications and instructions printed on the package, on any leaflet, on any manual for use by the beauty operator, or on the website www.mmagi.it.
- **Professional product** for body treatment in Kit, which includes two different products:
 - 25 ml PET bottle - Liquid + Powder of cosmetic active ingredients in the cap to be used only by the beauty operator with a massage lasting 10/15 minutes, between one application and another of the 10 ml bottle.
 - 10 ml PET bottle - Liquid + Powder of cosmetic active ingredients in the cap to be used, even directly by the person undergoing the treatment, with a short massage until the product is absorbed, between one application and another of the 25 ml vial;
- **External use** for exclusive professional use by personnel qualified in the beauty profession, who based on their science, knowledge and experience are able to use it in the right and correct manner on an audience of adults: keep out of reach of children.
At the discretion of the beauty operator, the 10 ml bottle, which alternates in application with the 25 ml bottle that is performed only directly by the beauty operator, can be used directly by the person undergoing the treatment, naturally on precise indications and instructions from the same beauty operator authorized to practice the profession.
- **Perform** a simple test before using the products on the body, especially for the most sensitive subjects. Try the two components of the treatment in succession on a small portion of skin on the forearm and wait the following 24 hours to see if there are any allergic reactions. If no reactions occur within 24 hours, the product can be used without problems. If there is any reaction, do not use the product.
- **Use** the product on healthy skin, do not use on damaged skin with wounds, burns or abrasions.
 - Preparation of the 25 ml bottle - Screw the cap until the undercap that contains the active powder that will fall into the liquid below breaks. Once the powder has fallen, shake the bottle vigorously with the cap still on until the powder has completely dispersed into the liquid underneath. At this point, remove the cap and start using the product by massaging it onto the affected parts of the body.
 - Preparation of the 10 ml bottle – Screw the cap on until the undercap containing the active powder breaks and it will fall into the liquid underneath. Once the powder has fallen, shake the bottle vigorously with the cap still on until the powder has completely dispersed into the liquid underneath. At this point, remove the cap and start using the product by massaging it onto the affected parts of the body.
- **Avoid or proceed** with extreme caution and attention, during the treatment, in the most delicate areas of the body.
- **If** the product should inadvertently come into contact with the eyes and/or mucous membranes, rinse the affected area thoroughly with fresh water.

Italian cosmetics for well-being

- **If** due to some incorrect maneuver the product should be inadvertently ingested, go to a poison center of a hospital with the composition/ingredients of the product, printed on each primary or secondary package. In the absence of hospitals, induce vomiting.
- **Do** not exceed the times and quantities of product to be applied, in relation to the type of skin, indicated.
- **Single-use** product to be used in a single and single treatment application.
- **The** PAO rules do not apply to the product as it is disposable, for a single and single treatment application.
